

**Para-hydroxy Benzoates not detected in Indofood “Indomie Mee Goreng”  
Instant Noodles in Singapore**

AVA conducts regular checks on instant noodles as part of our food safety surveillance programme. Following reports of the detection of Para-hydroxy Benzoates in “Indomie” instant noodles in Taiwan, AVA has as a precautionary measure, taken samples of the noodles for further investigation. (Para-hydroxy Benzoates is a chemical preservative that is not allowed in instant noodles under our Food Regulations.)

2 Test results thus far showed that Para-hydroxy Benzoates are not detected in the “Indomie” instant noodles in Singapore .
